

PL210 CALF

- > **Length:** 140cm
- > **Width:** 82cm
- > **Height:** 92cm
- > **Weight:** 75kg
- > **Maximum load:** 200kg
- > **Starting weight:** 11kg

- > **Easy adjustment of the supports height for the thighs.**
- > Studied design to look for correct angle that allows the accurate development of the calf muscles.
- > High durability stainless screws
- > Ultra solid steel chassis. Combination of two kind of tubes: 76mm diameter circle tube and 100x50mm oval tube; both with 3mm width. **TIG welding in all the union points.**
- > The grips and supports are composed of a double handle with negative inclination for the arms, a vertical handle to hold securely the bar and two inclined pedals to ensure the correct traction with the feet.
- > **Fireproof upholstery** made in hi-density polyfoam for more confort and reliability.
- > **High precision industrial ball bearings** to ensure smooth operation and protection against corrosion.
- > Elastic adjustments that allow the user to adapt easily and accurately to the machine
- > Rubber protections on the supports to avoid scratches.
- > Anti-slip aluminum grips for the best feeling during exercise and the greatest guarantee for durability.
- > Diameter of the grips: 38cm
- > Due to the proportional parametric design, the machine offers a wide range that allows the correct use of the machine to any kind of people.
